MEMPHIS, TENN., THURSDAY, OCTOBER 2, 1884.

CAPT. RYAN, of the Hook and Ladder Company, has made a very important inntion by which the celerity and efficiency of the Fire Department will be greatly promoted. It consists of a very Laying of the Corner-Stone of the M. C simple mechanical attachment, elsewhere fully described, that fastened to the door of an enginehouse is moved by the same electric power as that which gives an alarm of fire and at the same time that the alarm is given. This will save some seconds, perhaps minutes, in getting the horses in place and the engine out, and is therefore invaluable. Capt. Ryan has tested his invention, and has satisfied himself and others that it is perfect. We congratulate him and the department upon it and hope he will reap the reward in profit that he is entitled to by his patient investigation and labor.

Public feeling as to the necessity of reforming or abolishing the House of Lords grows apace in England. Even the London Times concedes that reform is necessary, and it has expressed itself as favorable to the weeding out of the hereditary peers and substituting life peers. It would be a lasting disgrace to all classes in the district if A.G. Pearce were elected. THE DROUTH IN VIRGINIA

Lynchburg, October 1.—The weather is oppressive. The thermometer has scarcely fallen below 90°, night or day, for a week. The drouth throughout Piedmont is without a parallel. Vegetation is burned up and the ground is parched to a great depth. Fall seeding is delayed. The hay crop is destroyed. In parts of Southwestern Virginia graziers are driving stock into Tennersee for water. Small streams are drying up. At many places forest trees are dying. Many forest fires are raging. The tobacco year closed with September. Sales for the year were a little over 21,000,000 pounds, 3,000,000 pounds less than the year previous. It is safe to say that the incoming crop is much larger, although cut sho

Cures every form of Fever and Ague, and Maiaria. The chill when broken does not return The reason of its superiority over Quis and other remedies:

Is because in these DISEASES there is always derangement of the liver and often of the digestive organs. The remedies usually given have relevance only to breaking the chill without regard to the condition the system may be left in; whereas the mere breaking of the chill is but a small part of what is required. The various organs of the body, more especially the liver and stomach roust be brought into a healthy condition, otherwise the return of the chills will be the probable result.
